By Developer: Tencewill
Overseen by Project Manager: Stephen Rawlins
Of: websitedesign.co.za

Certificate added to domain on the: 19.04.2017
URL of Certificate: <http://fxcorp.co.za/WD2016SEOCertificate.pdf>
Domain: <http://fxcorp.co.za/>

Notes:

Search Engine Optimization (otherwise referred to as S.E.O.) is when certain principles, tasks and actions are taken to influence search engines to understand and better rate a website and its pages for position/s on their search results.

SEO is one of three types of three main web marketing tools: PPC, SEO and Affiliate/Socail.

SEO can broadly be divided into two sections:
Steps and tasks that can only be done once

R.P.D. (Research, Plan and Development) is our own acronym we give to broad variety of tasks / tools and software we use related to the processes we follow to analyze and research your website and its pages, its products and services, its content, structure and general quality in context of the current market as well as against primary competitors (websites and pages with better positions on search engines for primary search phrase). Based on data and research we then plan which SEO tools and tasks to use to actively target and actively achieve better positions This is a step missed by nearly all SEO and web design companies and is the reason SEO results can be slower than they need to be and more costly in the long run.

RPD can be implemented at different levels depending on the competitiveness of the market. It can also be repeated in part from time to time. We recommend at least every 2 years, or whenever a search engines make major changes to their algorithms.

Setup. This is the phase of steps and tasks that can broadly only be done once. This is the first phase SEO work is physically done. Not all set up steps and tasks need to be done on all websites and pages, and in fact can have a negative effect if done incorrectly. Setup steps and tasks are the foundation of good SEO. RPD is where the selection of Setup tasks and tools for this phase are decided.

RCR&M = Repeated checks, Reviews, Tasks and Maintenance. This phase of SEO are tasks can be repeated indefinitely, and where the majority of work is done. It is also the main reason why no company should claim to be able to sell a client once off SEO. While a complete RPD is recommended once a year, the **RCR&M** phase essentially uses the ground work completed during the Setup phase and builds on from it. This phase should be done no less than once a month for the simple reason that search engines review (in general) a site or parts of a site at least once a month, therefore your rankings and positions on search engines are reevaluated against any new competitor or current competitor website who has made changes since your websites last review. The more competitive the market, the more frequent RCR&M should be done.

| Phase | Task / Description / Detail | Notes History | Completed Date |
|-----------------------|---|--|------------------|
| R.P. D. - with Client | General consult and client brief. Summary of desired results and expectation on dates to achieve and a background overview on products / services / industry competitiveness / website status look and feel, function and SEO status. This is done via phone or meeting. | | |
| R.P.D. | Assessment of own site | | |
| | Areas of products or services | Not done yet: SEO recommend. | |
| | Primary products and services | Not done yet: SEO recommend. | |
| | How many competitors feature for primary products and services 1st page of google natural (actual mention of product and service in description or title) | Not done yet: SEO recommend. | |
| | Page count | Not done yet: SEO recommend. | |
| | Image count | Not done yet: SEO recommend. | |

| RCR&M | Speed check | Not done yet: SEO recommend. | | | | | |
| RCR&M | Send copy of RCR&M to Client and PM | Not done yet: SEO recommend. | | | | | |
| RCR&M | Update SEO certificate | Not done yet: SEO recommend. | | | | | |

Primary Keyword = a search phrase of two or more words that include the main product or service and often the location of operation. A Primary Keyword can also reference the main objective of a page on a website. For example: "car hire cape town"

We generally load the more important word first, for example, to a company that does car hire, the wording car hire is more important than the words cape town. This is not always obvious, but in some cases and services, search engines determine your location already and filter the search results.

Primary Keyword Extension = is an add on to a Primary Keyword. For example: "Car hire in Cape Town" the extension here is "in" and this in fact creates an entire new search phrase and results on search engines can change because of this.

Each web page (not website) should have no more than 1 Primary Keyword, and then its extensions.
For example:

Primary Keyword = "car hire cape town"

Extensions = "car hire in cape town" "cheap car hire cape town" "car hire cape town reviews" "car hire cape town prices" "car hire cape town pictures"
